

Left panel is from Jacobs et al. JAMA Neurol. 2014;71(7):921-923. doi:10.1001/jamaneurol.2014.870. Right panel is a plot of data estimated from the left panel. Visual inspection indicates acceptable data extraction accuracy.

Note: Reported values of r^2 and p in the published plot (left) are incommensurate. With effect size $r = 0.40$ and $n = 28$, $p = 0.04$.
